

West Palm Beach

April 13-14, 2019

Cost: **\$200** per person includes air tanks (\$220 per person for Nitrox, must be Nitrox certified)

Florida's East Coast has a unique advantage over all other diving locations along Florida's coastline - the Gulf Stream. This massive oceanic current swings closer to shore off West Palm Beach than anywhere else along the state. The result is a remarkable catalyst for an environment of warm, clear blue water (70 to 100 foot visibility is the norm) deposited by the current's steady northward flow, and a host of marine creatures, some seldom found anywhere else in Florida.

We will be doing 2 dives with Pura Vida Divers on Saturday afternoon and 2 dives Sunday morning. Meeting time is 1:00pm Saturday afternoon and 7:30am Sunday morning. These drift reef dives will be 50-60ft. Surface marker buoy and dive computer are required.

Call Gulfport Dive Center at 727-498-8702 to get signed up!

Price of the trip is non-refundable unless cancelled by the dive center.
